About the Index

The FTSE KLD Global Sustainability Index is a broadly diversified global benchmark based on environmental, social, and governance (ESG) rankings. Applying a “best of class” methodology, the GSIN holds companies with the highest sustainability rankings in each sector in each region, with a target of being sector-neutral and region-neutral. The GSIN is a float-adjusted, market capitalization weighted index.

Sector and region neutrality limit the financial risk associated with biases sometimes introduced into SRI and sustainability indexes by the selection process.

Sustainability analysis focuses on whether companies are able to address the social and environmental needs of the present without compromising the quality of life of future generations.

KLD rates a company’s sustainability performance analyzing:

Environment: management systems, climate change impact, emissions, and pollution prevention

Social: community & society, employees & supply chain, and customers

Governance: board structure, executive compensation, political accountability, and disclosure

The FTSE KLD Global Sustainability Index Series includes:

- FTSE KLD Global Sustainability Index (GSIN)
- FTSE KLD Global Sustainability ex US Index (GSXU)
- FTSE KLD Asia Pacific Sustainability Index (APSI)
- FTSE KLD Europe Sustainability Index (EUSI)
